PROFILE SUMMARY

QA Engineer with 5 years of experience in software quality assurance and test automation across fintech, banking, logistics, and digital product domains. Experienced in manual, automation, performance, end-to-end, and API testing, with strong capabilities in designing maintainable automation architecture and frameworks. Skilled in Playwright, Agile and Scrum delivery, and AI-assisted QA workflows that improve test coverage, release confidence, and team productivity.

WORK EXPERIENCE

QA Engineer · Yapp

June 2026 - Present | Project: All-in-one Content Creator Monetization Platform

Features: Online Course, Exclusive Content, Feed, Telegram Membership, Discord Membership, Consultations, Events and Tickets, Campaign, Membership, Livestream

- Execute comprehensive manual, functional, regression, and exploratory testing across creator and monetization workflows.
- Design and maintain end-to-end and API automation using Playwright, including the automation architecture, framework structure, fixtures, utilities, and reusable test patterns.
- Perform performance testing to assess responsiveness, scalability, and platform reliability.
- Build an AI-assisted workflow to transform product requirement documents (PRDs) into structured test cases and scenarios, using Hermes Agent to support test analysis and execution.
- Collaborate with product and engineering teams to validate fixes and improve release confidence.

SDET · Lion Parcel (under MSBU)

October 2025 - May 2026 | Project: Genesis & Liberta - Integrated Logistics & Shipment Management System

Features: Booking and Configuration

- Refactored Robot Framework.
- Migrated automation scripts from Robot Framework to Playwright using AI assistance, including prompt strategies and AI workflows.
- Designed an AI workflow for automation with skill roles, command structures, and context management rules as a team standard.
- Created automation scripts for web, API, and mobile testing; performed database, API, regression, and tech debt testing.

Key Achievement:

- Raised regression success rate from 60% to 90% through systematic Robot Framework refactoring.
- Pioneered AI-assisted Robot to Playwright migration with a self-designed workflow and command structure.

QA Automation Engineer · Bank BRI (under Talent Tech)

May 2024 - September 2025 | Project: Ocean - Issuing

Features: Onboarding Card & Client, Transaction, Data Limit, Maintenance, Reports

- Built N2N and API automation scripts using Katalon Studio with Cucumber BDD.
- Conducted SIT and supported UAT across all feature modules.
- Performed sprint sanity testing, automation maintenance, database validation, and API testing.
- Performed Android mobile, web, and desktop testing; participated in DSU, sprint planning, review, and retrospective.

Key Achievement:

- Delivered full N2N automation coverage for a legacy desktop app with no element selectors using an RPA approach.

SQA Engineer · Asset Data Solution Sdn Bhd

January 2022 - September 2024 | Project: Management Asset - Asset Management System

Features: Asset Data, Inventory, Helpdesk, Insurance Claim

- Built the company's first automation framework from scratch using Selenium, Appium, and Rest-Assured.
- Created test plans, test cases, and test scenarios for all modules from zero.
- Executed smoke, integration, acceptance, and regression testing each sprint.
- Performed performance testing using K6 to measure system scalability under load.
- Performed cross-platform mobile testing (Android and iOS), web testing, database testing, and API testing.
- Documented and reported bugs in Jira.

Key Achievement:

- Built the company's QA automation practice from zero and established the framework used throughout the project lifecycle.

TECHNICAL SKILLS

Automation	Playwright · Selenium · Appium · Katalon Studio · Cypress · Robot Framework
BDD	Cucumber (integrated with Playwright, Selenium, Appium, Cypress, Katalon)
Performance	K6 · JMeter
API Testing	Postman · Rest-Assured · cURL
Languages	JavaScript (JS) · TypeScript (TS) · Java · Python
Database	SQL · DBeaver
DevOps / CI-CD	Git · Jenkins · GitHub Actions · Pipeline
AI Tools	Prompt Engineering · AI-driven test generation · AI workflow design · Skill role & command structure
Testing Types	Functional · Regression · Smoke · Integration · UAT · Performance · Load · API · Mobile · Desktop · Security (Basic)
Project Tools	Jira · Agile / Scrum · Kanban · Sprint

EDUCATION

S1 - Information System

Universitas BSI Bandung | 2019

D3 - Informatics Management

Universitas BSI Tasikmalaya | 2017

CERTIFICATIONS

- Test Automation with Katalon Studio (Selenium WebDriver) - Udemy
 - Cypress with Cucumber BDD Automation Testing Bootcamp - Udemy
- Appium - Mobile Testing Android/iOS - Udemy
 - Playwright JS/TS Automation Testing from Scratch & Framework - Udemy
